HOUSANDS are held back in life for want of sufficient iron in the blood, asya Dr. James Francis Sullivan, formerly physician of Bellevue Hospital Courdoor Dept., New York, and the Westchester County Hospital, in commenting on the relation of strong nerves and physical endurance to the attainment of success and nower.

ing on the relation of strong nerves and physical endurance to the attainment of success and power.

"A weak body means a weakened brain; weak nerve force means weakened will power, and like the race horse beaten by a nose, many a capable man or woman falls just short of winning because they don't back up their mentality with the physical strength and energy which come from having plenty of iron III the blood. That irritable twitch, that fit of despondency, that diazy, fearful feeling—these are the sort of signals nature gives to tired, listless folks when the blood is clamoring for strength-glving iron—more from to restore the health by enriching the blood and streating thousands of new red blood cells.

"In my opinion the greatest curse to the health and strength of American people of to-day is the alarming deficiency of iron in their blood. Iron is absolutely essential to enable your blood to transform the food you set into muscular tissue and brain It is through iron in the red coloring matter of the blood that life-sustaining oxygen enters the body. Without iron there is no strength, vitality and endurance to combat obstacles or withstand severe strains. Lack of sufficient iron in the blood has ruined many a man's nerves and utterly robbed him of that virile force and stamina which are so pecessary to success and power in every walk of life.

"Therefore, I strongly advise those who feet the need of a strength and blood builder.
